To High School Administrators

I have developed some software to schedule exam sessions. This software is based on a program that I wrote 12 years ago (and modified frequently) while I was a Vice-Principal and then Principal of Laval Catholic High School. I used this software to schedule all exams, supervisions and corrections for 11 years. This software is currently installed in several schools.

I rewrote the software to make it easy to use and as a Microsoft Access database application.

Some screen shots and reports are at the bottom (Many of these screens have had changes as the program has developed):

The screen images should explain the main concept of the software. However here are a few of its functions and specifications:

1. There is no limit to the number of sections, teachers, rooms, fields, hall supervisions, or other assigned tasks.
2. The room and the supervisor can be pre-selected
3. The group size is matched as closely as possible to the room capacity. If there no room available that is large enough, the room is left blank for that section. A room can be manually assigned and locked.
4. Teachers are not allowed to supervise groups in their own field, unless you pre-select them or check an option that allows it.
5. Keeps track of the number of minutes of exam, hall supervision and correction time and other tasks.

6. Teachers can be pre-assigned to a correction centre at specific dates and times; and this time will be added to their total assigned time.
7. Teachers can be assigned to other tasks via the hall supervision module. This duration of these tasks will be added to the overall time allotted to the teacher.
8. Once all the data has been entered (probably 1 hour for a large school) the scheduling process takes less than 5 minutes.
9. The data (especially rooms, teachers, supervision stations and even subject sections) should remain fairly stable throughout the year and probably over several years. So data entry will be shorter after the initial entry.
10. The data can be imported from GPI using the GPI Export function.
11. Many reports can be generated.
12. You can filter on any field.
13. If you have Adobe Acrobat, the reports can be turned into PDF files to place on web sites or be emailed.
14. Once the computer has completed the assignments, you can make changes easily and lock the changes.
15. You can try many scenarios in a short period of time
16. You can save various scenarios and return to these versions
17. The software assigns exam supervisions first and hall supervisions last. The assumption is that exams MUST have a supervisor
18. Examination rooms are assigned independently of invigilators (and should be scheduled first) - the idea is that if you don't have a room; it doesn't matter if there is a supervisor available. The same room can be pre-assigned to multiple sections if you wish to hold exams in a central location or schedule 2 small classes in 1 room. Rooms are assigned in the order they are listed in the rooms table. You can place

- preferred rooms first. Rooms are assigned to match the room capacity with the number of students in each class.
19. Large groups are assigned first to ensure they are in large rooms.
 20. Rooms can be assigned in a set priority.
 21. Supervision locations are stored in a table so they can be changed easily.
 22. Supervision time blocks are also stored in a table.
 23. Teachers are assigned starting with the teacher who has the least supervision time. Teachers are assigned in Alpha or reverse Alpha order depending on the day of week of the task.

If you are interested in this type of software, or have suggestions please contact me.

A price list is attached along with several sample reports.

Screen Shots

Some are sideways to make them easier to read when printed. All personal information has been blurred. In addition, there have been significant

changes to the program since these screen shots were made.

Room Schedule

Reports

There are several sample reports on the next pages.

Cost structure for Exam Scheduling Software as of Nov 8, 2006

| Units | Unit Cost | Yearly Maintenance Cost | * Additional work per hour |
|----------|-----------|-------------------------|----------------------------|
| 1 to 5 | \$500.00 | \$100.00 | \$50.00 |
| 6 to 10 | \$490.00 | \$100.00 | \$50.00 |
| 11 to 15 | \$480.00 | \$100.00 | \$50.00 |
| 16 to 20 | \$470.00 | \$100.00 | \$50.00 |
| 21 + | \$460.00 | \$100.00 | \$50.00 |

* This is work done if a school wants to add custom features

The cost includes installation at the school and 1 hr training, plus free telephone support for 6 months.

The software is written using Microsoft Access 2003 which must be installed on any computer required to run the software. The software is multi-user and can be used by up to several people simultaneously.

The fee does not include travel to your school.
